

OBSERVATION FORM

As employer, it is your responsibility to ensure your operators receive training specific to the equipment and gear they will be using, as well as the situation in which that equipment will be used. The training presentation and written exam satisfies the requirements for classroom training. But to be in complete compliance, regulations dictate that operators/workers must also pass a practical examination administered by a qualified trainer.

This is the employer's opportunity to observe trainees in a controlled environment in order to assess whether they have successfully applied the principles from the classroom instruction.

While regulations do not specifically outline the extent of such an observation, you should take ample time to observe the trainee practicing the tasks they will be performing on the work site. At the very least, this should include carrying out a pre-shift inspection as well as other basic principles that govern safe operations or work practices.

If any voice and hand signals are required as part of the job, the trainee should also demonstrate an understanding of these signals and their corresponding functions.

To assist with this responsibility, we have provided a general form you may use when administering the practical examination. Feel free to modify this guide to create one more specific to your employee, equipment, worksite, or job needs.

HOW TO USE IT:

- 1 Simply **OBSERVE** the trainee's competency based on the modules included.
- 2 Follow the list, **CHECKING THE BOX** to indicate whether they satisfactorily performed each task.
- 3 When done, **SIGN AND FILE** this form along with the examination record and certificate.

WORK SAFE, STAY SAFE

OBSERVATION FORM

EMPLOYEE'S NAME: _____ TOPIC/EQUIPMENT: _____

EVALUATOR'S NAME: _____ TITLE: _____

The purpose of the evaluation form is to aid the evaluator in assessing the worker's competency to safely apply in the field the principles learned in the classroom. Items may be added or deleted depending on the working environment or the needs of your employees and company.

SATISFACTORY?		TASK	REMARKS
YES	NO		
PRE-SHIFT (VISUAL, FUNCTIONAL):			
		Have the worker correctly name the various types of lockout devices	
		Have the worker point out correct forms of lockout devices (mixed with unapproved items)	
		Have the worker point out correct forms of tagout devices (mix with unapproved items)	
		Have the worker explain the requirements for LOTO devices (durable, substantial, standardized, identifiable, etc.)	
		Make sure the worker knows how to properly fill out a tagout device	
		Have the worker explain the main energy types	
		Have the worker find the Energy Control Program then locate specific sections	
		Have the worker explain the different types of employees	
OPERATIONS:			
		Observe the worker communicating a pending lockout and tagout with the appropriate groups	
		Observe the worker shutting down the equipment	
		Observe the worker applying lockout devices	
		Observe the worker applying tagout devices	
		Observe the worker isolating all energy sources	
		Observe the worker verifying the energy isolation	
		Observe the worker communicating a power up then powering the equipment back on	

OBSERVATION FORM

ADDITIONAL/POST-SHIFT:

		Ensure the worker understand s, inspects and uses the appropriate PPE for the job	
		Ensure the worker knows how to handle unauthorized employees	
		Ensure the worker knows what to do in case of accident or emergency
