

PRACTICAL EXAMINATION

As employer, it is your responsibility to ensure your operators are trained specific to the equipment and gear they will be using, as well as the situation in which that equipment will be used. The training presentation and written exam satisfies the requirements for classroom training. But to be in complete compliance, regulations dictate that operators must also pass a practical examination and observation portion.

This is the employer's opportunity to watch the trainee in a controlled environment in order to assess whether or not they have successfully applied in the field what he or she learned in the classroom.

While regulations do not specifically outline the extent of such an observation, you should take the time to observe them in regards to the jobs they will be performing on a daily basis. At the very least, this should entail going through a pre-shift inspection as well as basic principles governing safe operations.

To assist with this responsibility, we have provided a general exam you may use in administering the practical examination. Feel free to use it as is or as a guide to create one more specific to your employee, equipment, worksite, or job needs.

HOW TO USE IT: *It's as easy as 1, 2, 3 . . .*

1. Simply observe their knowledge based on the modules included.
2. Go down the list, checking off that they satisfactorily performed each task.
3. When done, sign it and file it along with the examination and certificate.

Work Safe, Stay Safe

Man Overboard Evaluation Form

Operator's Name: _____ Date: _____

Evaluator's Name: _____

The purpose of this evaluation form is to aid the evaluator in assessing the operator's understanding of the subject matter. Items may be added or deleted depending on the needs of your ship or company.

Equipment

	Sat.	Unsat.	Remarks
Has a knowledge of different types of PFDs and their uses			
Dons PFD correctly			
Dons immersion suit correctly			
Illustrates an understanding of different location devices, how they work, and when to use them			

Prevention:

	Sat.	Unsat.	Remarks
Demonstrates knowledge of fall protection equipment, how to use it and when			
Demonstrates understanding of fatigue and how to avoid it <ul style="list-style-type: none">• Sleep• Rest• Diet• Health Concerns			
Can recognize slip and trip hazards specific to the ship			

MOB & Rescue:

	Sat.	Unsat.	Remarks
Demonstrates proper MOB steps: <ul style="list-style-type: none">• Shout• Point• Throw			
Demonstrates familiarity with rescue equipment aboard the ship: <ul style="list-style-type: none">• Ropes• Ladders• Baskets• Rescue vessels			
Can use AED properly			
Demonstrates knowledge of CPR			
Demonstrates how to properly treat hypothermia
