

PSSR PRACTICAL EXAMINATION

As employer, it is your responsibility to ensure your operators are trained specific to the equipment and gear they will be using, as well as the situation in which that equipment will be used. The training presentation and written exam satisfies the requirements for classroom training.

This is the employer's opportunity to watch the trainee in a controlled environment in order to assess whether or not they have successfully

applied in the field what he or she learned in the classroom.

While regulations do not specifically outline the extent of such an observation, you should take the time to observe them in regards to the jobs they will be performing on a daily basis. At the very least, this should entail going through a pre-shift inspection as well as basic principles governing safe operations.

As far as voice and hand signals are concerned, the operator should also demonstrate an understanding of these signals and their corresponding functions.

To assist with this responsibility, we have provided a general exam you may use in administering the practical examination. Feel free to use it as is or as a guide to create one more specific to your employee, equipment, worksite, or job needs.

HOW TO USE IT: *It's as easy as 1, 2, 3 . . .*

1. Simply observe their knowledge based on the modules included.
2. Go down the list, checking off that they satisfactorily performed each task.
3. When done, sign it and file it along with the examination and certificate.

Work Safe, Stay Safe

PSSR Evaluation Form

Operator's Name: _____ Date: _____

Evaluator's Name: _____

The purpose of the sea survival evaluation form is to aid the evaluator in assessing the operator's competency to utilize the equipment safely and correctly. Items may be added or deleted depending on the operating environment or the needs of your company.

On Board Ship:

	Sat.	Unsat.	Remarks
Dons immersion suit correctly			
Packs away immersion suit correctly			
Dons life jacket correctly			
Understands various ship alarms and their meanings			
Life Buoy			
Actions to be performed when at station			
Fire Extinguisher			
Reacts in a timely manner for indicated emergency to minimize potential dangers and threats			
Practices Oil Spill Prevention			
Employs Oil Spill Response			
Proper Storage of Chemicals			
Understands Safety Signs			
Knows Location of Emergency Equipment			
Uses Proper PPE			
Proper Care and Cleaning of PPE			
Follows Confined Space Procedures			
Knowledge of Hand Signals			

Man Overboard Procedures:

	Sat.	Unsat.	Remarks
Points			
Sounds Proper Alarm			
Throws Flotation Device			
Employs Recovery Plan			

In the Water Procedures:

	Sat.	Unsat.	Remarks
Covers Mouth and Nose			
Grabs Flotation Device			
Assumes H.E.L.P. Position			

Fire Onboard Procedures:

	Sat.	Unsat.	Remarks
Proper Prevention Practices			
Find			
Inform			
Restrict			
Extinguish			

Abandon Ship Procedures:

	Sat.	Unsat.	Remarks
Employs Ladder, if available			
Ensures life raft is attached with painter			
Launches life raft into the water			

Pulls on painter to inflate life raft			
Descends ladder safely			
Paddles away from sinking vessel			
Searches for men in the water			
Method of boarding survival craft was appropriate and avoids dangers to others			

Hygiene Procedures:

	Sat.	Unsat.	Remarks
Wash Hands Correctly			
Check Mattress for Bugs			
Wash clothing/bedding Properly
